

WHEN IT COMES TO WIND RESISTANCE ...OUR COMPETITORS GET BLOWN AWAY

UHM Nylon
Wind Locks

WINDLOCK™ 652 Series Doors

Introducing the new Model 652 from US Door. It may look like every other metal roll-up door from the outside. But on the inside

the Model 652 steel curtain door from US Door & Building Components is loaded with innovative features that make it the best functioning wind load door in the industry. Take a close look at

US Door's U.H.M. nylon windlocks, they provide maximum protection without sacrificing ease of operation or installation. Depending on door size these windlocks enable the Model 652 to pass wind load testing of up to 60+ P.S.F. and can resist sustained winds of up to 140 M.P.H.

When Hurricanes Bonnie, Charley, Frances, Ivan, and Jeanne crisscrossed Florida last summer, not a single building equipped with a Model 652 roll-up door was compromised. Call 877-US DOOR1 for specific door sizes and applications.
